

READ BEFORE PRINTING

This IF:Equip PDF has been designed to provide you the option to print your study, whether at home or with a professional printer. Below are the instructions for printing your *What the Women Saw* PDF.

AT HOME PRINTING

The pages of the Attendee Guide are 8.5” x 11”, US Letter Size, or Standard Paper Size. All files are designed to be printed on 8.5” x 11” sheets of paper. For best results, print at ‘full size’ and not ‘fit to page.’

When you go to print the guide, we recommend printing front and back. Feel free to have the guides bound at a local FedEx or print shop, or you can put them together yourself with a hole punch and string. Feel free to get creative!

PROFESSIONAL PRINTING

Take this file to a professional printer, such as a FedEx or local printing shop. Here are the steps to getting this file printed correctly:

1. Put the file titled “What the Women Saw Study PDF” on a thumb drive and take it to the printer. You can also email the file to your printer, if that is an option.
2. Specify that you need the 8.5x11” PDF turned into an 11x17” folded booklet in color with saddle staple binding and trimmed edges. Be sure to ask for the booklet to be trimmed and note that the 8.5x11” PDF is **32** pages.
